

# Protect Your Child from COVID-19

The COVID-19 Pfizer Vaccine is now available to children 5-11 years old. CDC recommends children 5-11 years old to get vaccinated. Even children can get COVID-19, and the vaccine helps provide protection to keep children healthy.

**COVID-19 vaccine is safe, free, and effective for children 5-11 years old.**

**COVID-19 vaccine builds protection.**

**COVID-19 vaccine does not cause infertility.**
